

ASSEMBLY INSTRUCTIONS

BALANCE TABLE EXTENSION

ASSEMBLY INSTRUCTIONS

BALANCE TABLE EXTENSION

1. Turn table upside down (with its legs pointing upwards)
2. Decide which end of the table you want to fit the extension to. Fix 2 hexagon socket head cap screws (A) firmly to the rails on the table using nuts (D) (with the heads of the screws pointing towards the middle of the table).
3. Fit the table extension so that the heads of the hexagon socket head cap screws (A) slide into the recesses (B) at the end of the extension.
4. Fix the table extension to the frame of the table using 2 knurled screws (C) and the nuts (D) provided.
