## Defining the umbrella size

**Note: only for Weishäupl umbrellas with wooden frame (Klassiker, teak, half and basic umbrella)**

- Is the umbrella a Weishäupl umbrella? (label with the Weishäupl logo on the inside of the umbrella canopy)
- There are two different types of umbrella struts (see sketch on Page 3)
  - tensioning struts: struts to which the covering fabric is attached ("tensions" the fabric)
  - support struts: strut connecting the tensioning strut and the umbrella pole
- Is the umbrella
  - round/octagonal (all tensioning struts are the same length),
  - square (two tensioning struts of different lengths), or
  - rectangular (three tensioning struts of different lengths)?
- Features that will help to **identify the model of your umbrella:**

### **Klassiker umbrella:**

Wire and connecting elements are silver-colored.

Pulley blocks are made of brass.

Umbrella frame is made of ash (light-colored wood)

### **Teak umbrella:**

Wire and connecting elements are brass-colored. (Since 2019 silver-colored!)

Pulley blocks are made of brass.

Umbrella frame is made of teak (dark-colored wood).

### **Half umbrella:**

Like 'Klassiker,' but with a 'half' umbrella canopy.

### **Basic umbrella:**

Wire and connecting elements are silver-colored.

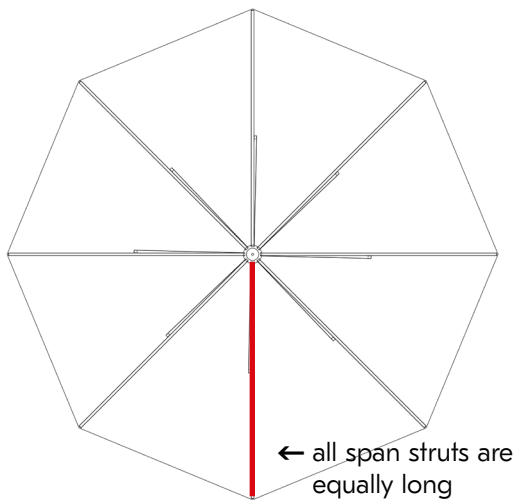

Pulley rollers are made of V2A steel

Umbrella frame is made of ash (light-colored wood).

Umbrella pole has a diameter of 48 mm.

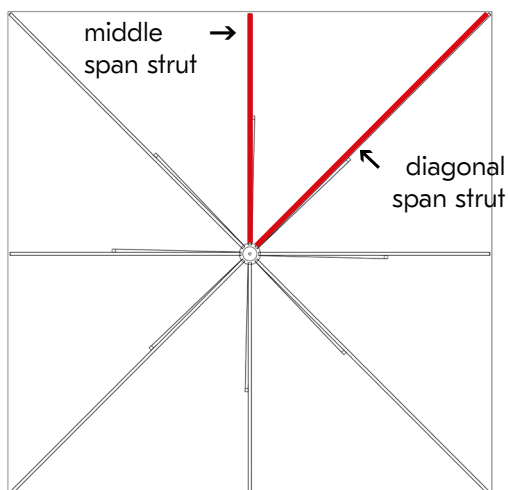

- **To define the umbrella size, please measure the exact length of the highlighted tensioning struts.** See sketches on the following page.
